● traditional blister of 6 ● coloured blister of 6 ● tin of 12

Please note that the contents may be substituted at any time with a product equal or superior to that specified.

LF - Lightfastness rating v- indicates that the ingredients of these products contain no animal products

Lightfastness refers to the chemical stability of a pigment under long exposure to light. Light can cause colour to whiten, darken, fade or completely disappear.

The Blue Wool Scale - two pieces of blue wool are used to test lightfastness. One is placed in the dark and the other in the equivalent of sunlight for a period of three months. After three months the two pieces of wool are compared and rated between 0 – 8. 8 is the highest rating and values of 6 or higher are considered to be lightfast.
